● ABOUT ME

I'm an enthusiastic, motivated and detail-oriented Front-end Developer. I have a certain technical base and understanding of the main processes since I've studied biophysics and biochemistry at the university, I also consolidated all this knowledge and delved into Web Development at the Front-end Bootcamp.

However, what sets me apart is my ability to approach web development from a scientific and analytical standpoint. I am able to break down complex problems into smaller components and devise solutions based on evidence and data.

Fast learner, hard worker and team player, passionate about building first-class websites.

● SKILLS

- HTML
- CSS
- Bootstrap
- JavaScript (jQuery, ES6, AJAX)
- Version control (Git)
- React.js (Material.UI, Framer Moution)
- Node.js
- Test-Driven Development
- Responsive design and mobile-first method
- Understanding of cross-browser issues
- Basics of UX design
- Figma
